DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 1 and 9-16 in the reply filed on 7/28/05 is acknowledged.
2. Claims 2-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected groups, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/28/05. In addition, claims 10-16 are also withdrawn because they depend on non-elected claims.

Information Disclosure Statement

3. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Specification

4. The abstract of the disclosure is objected to because it contains more than 2 paragraphs. Correction is required. See MPEP § 608.01(b).
5. The disclosure is objected to because of the following informalities: page 7, line 4, "Figure 1 is" should be replaced with – Figures 1A and 1B are --.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Umeda et al. (6,124,660).

Regarding claim 1 and 9, Umeda et al. shows all of the limitations of the claimed invention including the space factor between 50% and 80% in column 7, lines 15-20 and circular cross section winding in Figure 2.
